

OHIO DISTRICT OF KEY CLUB INTERNATIONAL

Thirst Project Fundraiser

RIGHT NOW there are over

785 MILLION 

people on our planet who don't have access to clean water. Crazy, right?!?! Well we're changing that and we need YOU!

*data from the UN

THIRST PROJECT MISSION

- Thirst Project hopes to educate the next generation by giving students the tools to be a part of social change, make a difference, and encourage others to join in the effort.
- Thirst Project is the world's largest youth water activism organization
- Join our fight to end the water crisis by fundraising with your Key Club.

THE PROBLEM: DIRTY WATER

The number of children under five that are affected daily from water related illnesses.

Children spend on average six to eight hours walking for water each day; time that should be spent in school.

Health & Sanitation

**1,000
deaths**

Food Security

**Ø
agriculture**

Children Education

**6-8
hours**

Economic Development

**3.75
miles**

Without access to a close, safe water supply, communities can not develop sustainable agriculture production for food security.

Women can't work or provide for their families because they are forced to walk an average of 3.75 miles each day just to fetch water.

THE SOLUTION: WELLS

Building hand pump freshwater wells is the Thrist Projects preferred method to end the water crisis. It's simple, self-sustainable, and if properly maintained, will last 40+ years. In the rural areas they work in, community members can be trained to repair these projects themselves.

Just **\$25** provides one person with **clean water for LIFE**, so let's see how many lives we can change.

Together, we can **END the global water crisis.**

Clean water truly changes everything.
